

TREATMENT COMMUNICATION

Dear customers, we would like to inform you that Anticimex 3D Sanidad Ambiental S.A.U. is going to carry out biocide treatments in its facilities, which due to the nature of the products used may cause discomfort or adverse health effects. We ask you to carefully follow the recommendations and precautionary measures set out below to minimise these effects.

AREA TO BE TREATED: Common areas.

Date: **Start time: 00:30h End time: 06:00h**

PURPOSE OF TREATMENT: Disinsectisation treatment to control adult mosquitoes.

1. All treatments carried out by Anticimex 3D Sanidad Ambiental S.A.U., are carried out by qualified and authorized technicians in the application of biocides.
2. All the products used by Anticimex 3D Sanidad Ambiental S.A.U., are authorized for the use or treatment we carry out, having a valid registration number for biocides in the Ministry of Health, Social Policy and Equality or a valid registration number for pesticides in the Ministry of the Environment, Rural and Marine Affairs.
3. We remind you that before carrying out the treatments, Anticimex 3D Sanidad Ambiental S.A.U carries out an assessment of the pest to be treated and proposes the treatments always prioritizing the least aggressive methods for people and the environment (physical or biological methods), always limiting the use of chemical products to those cases in which other methods are insufficient to achieve adequate control.
4. When choosing the product to be used, hygienic safety aspects are taken into account (less toxicity for humans and non-target species) and environmental safety (selectivity for the target species, less persistence in the environment), as well as the time and place of treatment (time of greatest vulnerability of the pest, safety periods of the product), in order to minimise the possible risks derived from treatments in both indoor and outdoor environments.
5. We attach to this communication the safety data sheets of the products used, as well as a sheet of recommendations to be followed, both before, during and after the treatments, recommendations that should be passed on to all neighbours who may be affected in the area of treatment.
6. For any questions or clarification about the treatment, please contact the technician responsible for the application

RECOMMENDATIONS IN AREAS TO BE TREATED

Antes del Tratamiento	Durante el tratamiento	Después del tratamiento
<p>Previo al tratamiento les serán comunicadas las áreas afectadas por el mismo.</p> <p>Si el tratamiento se va a realizar en zonas interiores, se deberá cortar el sistema de ventilación forzada en las zonas donde se vaya a realizar el tratamiento.</p> <p>Si el tratamiento se va a realizar en zonas exteriores, se deberán cerrar puertas y ventanas de edificios anexos o cercanos al área de tratamiento.</p>	<p>No estará permitida la presencia de personas ajenas al personal Técnico de la empresa en las zonas a tratar durante la realización del tratamiento. Tampoco está permitida la presencia de animales durante la aplicación de los biocidas.</p> <p>No estará permitido el tránsito de personas, animales o vehículos durante la realización de tratamiento.</p>	<p>No se utilizarán las zonas tratadas, así como las que hayan podido ser afectadas, hasta pasadas, como mínimo 12 Horas después de haber realizado el tratamiento. Estas áreas habrán sido comunicadas de forma previa.</p> <p>Si el tratamiento se ha realizado en zonas interiores, antes de utilizar dichas zonas o proceder a la limpieza de las mismas, se deberá ventilar adecuadamente cada zona tratada. La ventilación se realizará siempre después de haber transcurrido el plazo de seguridad.</p>
Befote Treatment	During Treatment	After Treatment
<p>Prior to treatment shall be communicated to the areas affected by it.</p> <p>If treatment is to be performed in inland areas, should cut the ventilation system in areas where it will perform the treatment.</p> <p>If treatment is to be performed in outdoor areas, should close doors and windows of outbuildings to the treatment area.</p>	<p>It will not be allowed the presence of people outside the company's technical staff in the areas to be treated during the course of treatment. Nor is it permitted the presence of animals during application of biocides.</p> <p>Not be permitted the transit of persons, animals or vehicles during the course of treatment.</p>	<p>Do not use the treated areas, as well as those who have been affected until after at least 12 Hours after the treatment. These areas have been reported in previous form.</p> <p>If treatment has been conducted in inland areas, before using those areas or proceed to clean them, you should ventilate each treated area. Ventilation is always made after the expiry of the security.</p>
